# How it works

- 1 Contaminants and large particulates are first trapped by the **Microfilter**.
- 2 Water is cycled through the high efficiency **Circulation Pump** filtering water up to 30 gallons per minute.
- 3 The patented **FROG® @ease™ Mineral Cartridge and SmartChlor™ Cartridge** sanitize and purify the spa water.
- 4 Air enters the unit where the **UV Bulb** converts it to Ozone and Hydroxyls.
- 5 Water enters the **AOP™ Unit** through the injector, drawing Ozone and Hydroxyls from the chamber. Static mixer combines water, Ozone and Hydroxyls in a scrambled flow.
- 6 Water irradiated by Germicidal UVC converts ozone to Hydroxyl Radicals through **Advanced Oxidation Processing**. Contaminants are destroyed by intense Germicidal UVC, Ozone, and Hydroxyl Radicals.
- 7 Water exits the unit to the **Mixer**, where water and air is mixed to keep ozone concentrated and isolated to maximize purification to produce the purest sanitized spa water possible.
